SUMMARY

Software engineering student and working student specialising in web development, with a focus on UI/UX design and agile front-end implementation. Experienced in leading IT workshops and projects.

BILDUNG

2023 – October 2027
Essen

Software Engineering (B.Sc.), Universität Duisburg-Essen

2020 – 2023
Mülheim an der Ruhr

General university entrance qualification, Gesamtschule Saarn,

PROFESSIONAL EXPERIENCE

June 2026 – Present
Essen

Student Intern in Web and Software Development, CAND VISION GmbH

- Conceptualization, design, and ongoing maintenance of modern websites.
- Development and implementation of customized software solutions for the efficient management of complex business processes.
- Ensuring smooth system operation and sustainably increasing process efficiency through future-proof IT structures.

January 2026 – Present
Essen

Lead Front-End Developer, www.öko2.com (startup project)

- Independent UI/UX design and full front-end implementation for a subsidized system model for building insulation.
- Ongoing performance optimization and quality assurance to ensure an efficient and stable web application.

Tutor, University of Duisburg-Essen

- Structuring complex tasks, providing practical feedback, and actively encouraging students to work independently.

April 2022 – January 2026
Mülheim an der Ruhr

Instructor for 3D Printing, Junior-Uni Ruhr

- Independently designing and conducting hands-on IT courses to teach complex technical concepts to children and teenagers in an accessible way.
- Mentoring project groups and effectively troubleshooting hardware and software issues to ensure smooth project progress.

Mülheim an der Ruhr

Programming Instructor, “Am Klostermarkt” Elementary School

- Teaching fundamental programming concepts by designing and leading LEGO Mindstorms EV3 workshops and providing targeted guidance on group projects.

PROJECTS

April 2025 – July 2025

SEP-Drive, Car-Sharing App (University Project)

- Conceptualization of the UI/UX design and collaborative front-end implementation of a car-sharing app for automated route planning and real-time trip tracking.
- Agile development of the client-side in a team and deployment as a standalone Docker container.

2025 – 2025

Portfolio website, , www.lucy-brandt.com

- Independently developed a responsive web application using React, JavaScript, HTML, and CSS.
- Conceptualized, prototyped, and designed user-friendly, interactive user interfaces in Figma.

SKILLS

Programming Languages
TypeScript, JavaScript, Python, Java, SQL

Web Technologies
React, HTML, CSS, UX/UI Design, CMS (ProcessWire)

Certificates
Meta Web Development Fundamentals

Tools
Git, Docker, Figma, Power BI

Languages
German - Native language
English - Fluent
